

# CUSTOM MEDALS AND AWARDS

# WELCOME

to the Catalogue of Personalized Trophies and Awards. Our offer not only includes a large selection of sports trophies, but also distinctive business awards, perfect for use in the corporate world. A wide variety of production techniques and personalization options allow us to create unique trophies that are both elegant and functional.

Our catalogue presents a diversity of awards that can be tailored to your individual needs. Each of our products was created with the possibility of personalization and adaptation to customer needs.

In the catalogue you will find detailed descriptions that will help you in making the best choice.

We invite you to discover our products, which stand out for their quality, original design and universality of use!

# MEDALS

We are one of the few in Europe to have their own medal factory, which enables us to produce a variety of medals to suit every budget. Thanks to this we can offer a wide range of production techniques, which makes our medals stand out not only unique design, but also the variety of available options.

This section was created to explain the differences between each techniques we use in the production of medals. We will try to present what affects the price, the most what kind of personalization possibilities we have and what lead times of orders that we provide to our customers.

We invite you to discover the diversity of forms, colours and techniques, that allow us to create remarkable awards.

# TYPES OF MEDALS

We have created one medal design that can be made in a variety of techniques. This unique design has been made specifically to illustrate better the differences between the available medal types. Thank to this, we present how the same motif can be interpreted in different techniques, showing their diversity and uniqueness.

**3D**

Production time: 3 weeks  
any shape

any shape  
colourful print  
openwork  
thickness 10 mm

**ACRYLIC**

production time: 10 days  
round shape  
colorful print  
engraving possible  
two sizes - 7 and 10 cm  
thickness 10 mm

**BIRCH**

# COLOURS OF THE MEDALS

We have a wide choice of colours available for our medals. We use two types of paints – transparent and covering. Additionally, in the case of transparent paints, it is possible to use a matte finish.

Our powder coating technology is 100% environmentally friendly and has no negative impact on the health of our employees.

If you choose products in galvanized colours, one of our proven suppliers provides such solutions. However, please remember that time of production for those medals is extended by 1 month approximately and adding additional pieces to an order is impossible.

**COVERING GOLD**

**COVERING SILVER**

**COVERING BRONZE**

**RAL 4010**

**P195.T018**

**P195.T015**

# RIBBONS

A ribbon is an integral part of every medal. We offer personalized ribbons and ribbon in standard colours.

## PERSONALISED RIBBONS

Available in different widths : 10, 15, 20, 25, 30 and 40 mm. We can make any print on personalized ribbons. They usually include logos of organisers and sponsors, dates and event names. Additionally, we also make double sided print. Sublimation ribbon could be sewn made into a lanyard, so that the medal can be used comfortably.

sealed

sewn

We also have ribbons with thick metal hook:

- ✓ 10mm
- ✓ 20mm

All ribbons up to 30 mm wide are **sewn**, but all 40 mm wide ribbons are **sealed**, which ensures exceptional durability and an aesthetic finish.

## STANDARD RIBBONS

They are available in 20 colours in large quantities in our warehouse. They are made of a different material than sublimation ribbon.

# DIE CAST MEDALS

## WHAT MAKES US STAND OUT?

### STEEL MOLDS, ECO PAINTS, PUZZLES, ROTATING ELEMENTS

We start the medal production process by preparing a mold on a CNC machine. We use precise metal molds to produce cast medals. The mold making process takes from 2 to 18 hours, depending on the complexity of the design.

By using a metal form, we guarantee:

- ✓ highest precision of workmanship
- ✓ repeatability of casting
- ✓ achieving fine details and textures

# AWARDS

Welcome to the section dedicated to bespoke awards! Here you will discover a world of unique awards that will fully reflect your vision of appreciation and honour. Our personalised awards are not only a form of recognition, but also an expression of admiration for uniqueness and achievement.

We create bespoke award, tailored to your guidelines and expectations. This type of award is growing in popularity due to its exceptional personalisation and uniqueness.

In addition, the lead time is up to 10 working days and, importantly, all our products are made in Europe. We are proud that every step of production takes place in our factory, ensuring 100% top quality and attention to detail.

We invite you to discover the variety of forms, colours and techniques that allow us to create awards with soul.

# TYPES OF AWARDS

To better present our capabilities, we created one project using several different techniques.

Let us create your unique award!

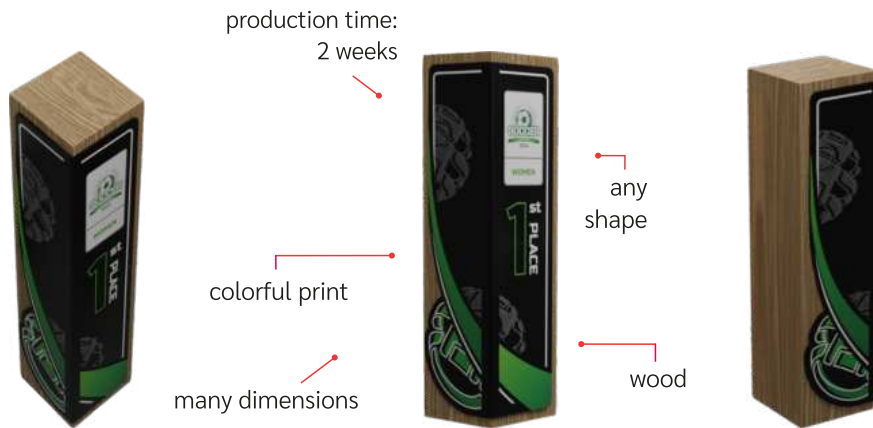

## METAL + MARBLE BASE

## METAL + WOODEN BASE

## 2 METAL PANELS + WOODEN BASE

## BLOCK AWARD

## MIXED MATERIALS

# PROPORTIONS OF AWARDS

1/2

2/3

1/1

3/2

The height of the award is one of the key factors influencing its price. The second important thing is its height to width ratio. The taller the award and the greater the amount of material used, the higher the price. Awards in 1/2 and 2/3 proportions are cheaper than those in 1/1 and 3/2 proportions.

# COLORFUL PRINT, SIZE AND THICKNESS

We use UV printing technique to personalize awards. Thanks to this, the award obtains a durable, colorful print that perfectly reflects the graphic design. This is a quick and effective finishing touch to the award. The print is durable and resistant to weather conditions. We have two types of UV colour printing.

**STANDARD PRINTING  
(FLAT)**

**STANDARD + PRINTING  
(HIGH-RELIEF)**

The type of print has a significant impact on the final price. The choice of Standard or Standard + overprint differentiates the production costs. Standard+ printing is more expensive compared to Standard printing.

The maximum size of the steel award we can make is **120 x 80 cm!** The steel we use can be from 2 to 10 mm thick. For awards with a marble base, we usually use 2 mm metal, and for awards with a wooden base, 3 mm sheet metal.

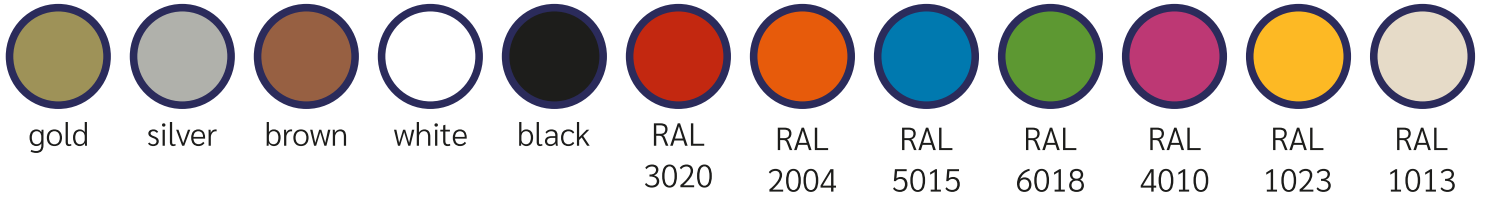

The thickness of the steel from which the awards are made of is a significant factor influencing their price. Depending on the design, the greater the thickness of the steel, the greater the solidity and durability of the award. Different steel thicknesses may affect the aesthetics and durability, which often affects the final cost of the product.

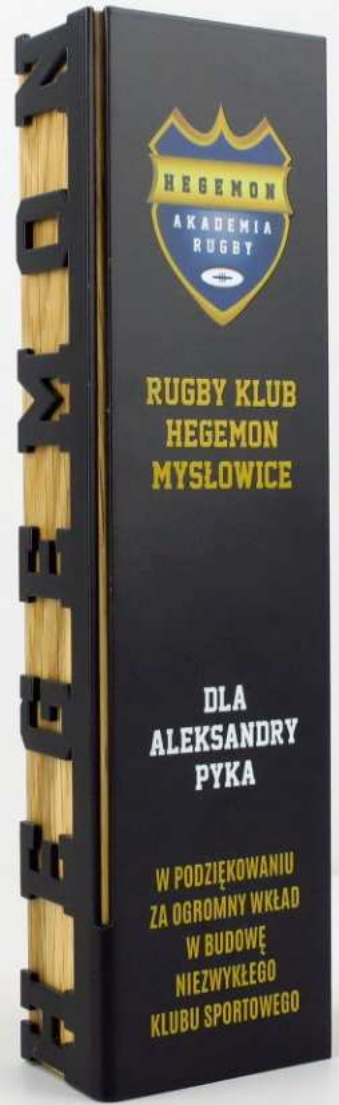

# COLOURS OF STEEL

We use certified and ecological powder paints to obtain a variety of colours. We use this decorating method mainly to protect the environment and the health of our employees. We have two types of paints - transparent and covering. The range of colours that can be obtained by powder coating is very wide. The colour of the metal **does not** affect the price.

# ACRYLIC CUSTOM AWARD

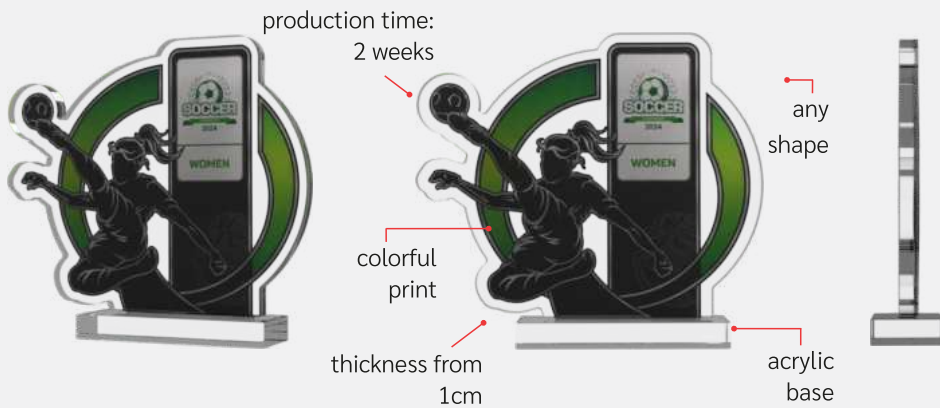

With a variety of bases, sizes and shapes, our acrylic awards allow you to create a unique award perfectly suited to the nature of your event.

# TYPES OF AWARDS

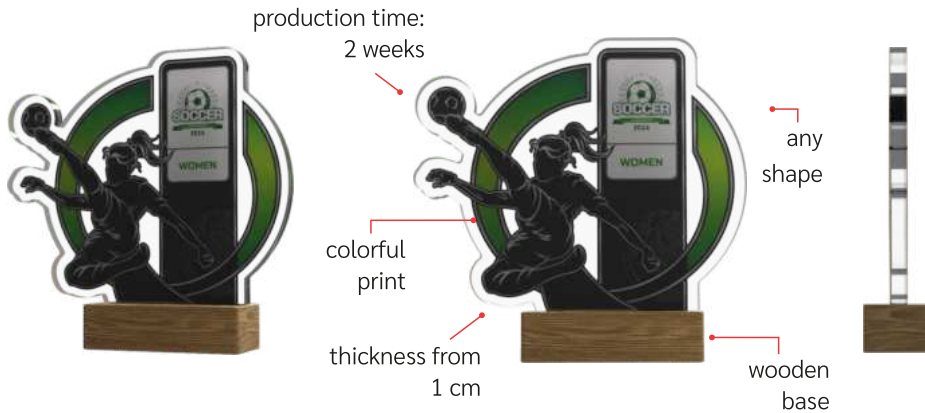

To better present our capabilities, we created one design using several different techniques.

## FREE-STANDING ACRYLIC

## ACRYLIC + ACRYLIC BASE

## ACRYLIC + WOODEN BASE

## MIXED MATERIALS

# PERSONALIZATION METHODS

To make the award unique in their kind, we use two personalization methods.

**COLORFUL PRINTING**

**ENGRAVING**

## POLISHED EDGES

Each edge of the acrylic award is **polished**. It doesn't matter whether the edge is straight or curved.

## COMBINING ELEMENTS

In our machinery, we can **precisely combine** cut elements from various materials.

## PACKING

It is also possible to pack the award in a **presentation case lined with foam adapted** to the shape of the award.

## PRODUCTION TIME

We can produce them for you within **2 weeks**.

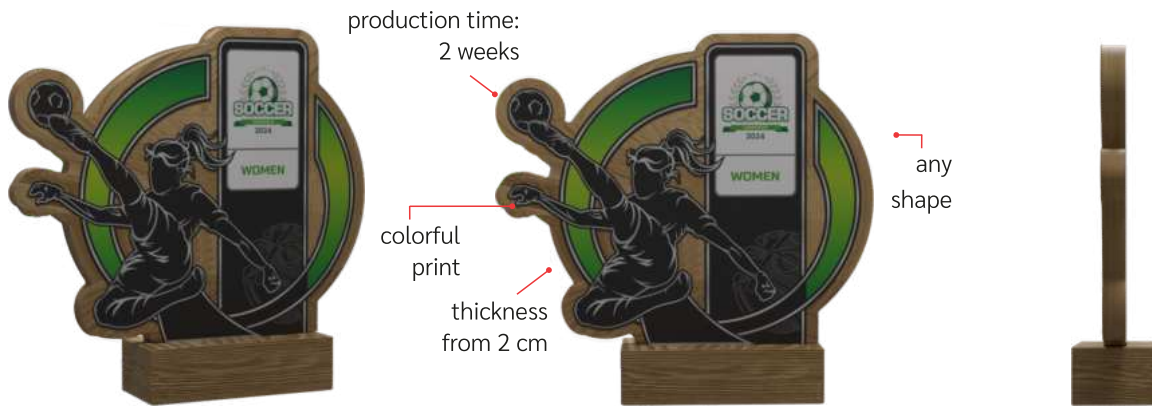

# ECO AWARD

We make awards from ecological materials - primarily wood. It is possible to make awards in any shape and size.

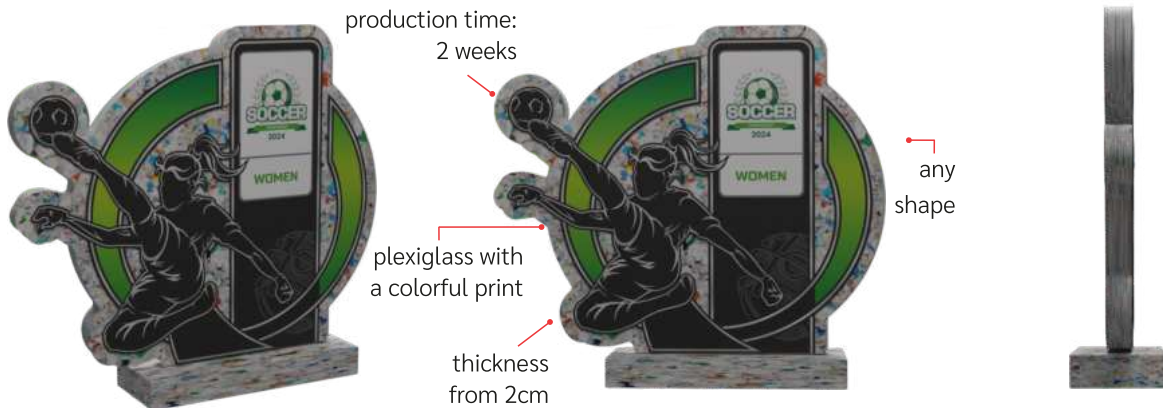

# TYPES OF AWARDS

To better present our capabilities, we created one design using several different techniques.

Let us inspire your unique awards!

## WOOD

## RECYCLING BOARD

# PERSONALIZATION METHODS

To make the award unique, we use two personalization methods.

**COLORFUL UV PRINTING**

**ENGRAVING**

The wood used to produce the awards comes from certified places that practice sustainable production policy. This means that an appropriate number of trees are planted in relation to those cut down to ensure future afforestation.

## SIZE AND THICKNESS

Ecological awards can be **20 to 30mm** thick. The maximum size of the award that we can make is **40 x 30cm!**

## ANY SHAPE

Each award is designed individually according to the customer's needs. Thanks to our machinery, we are able to create **any shape** of award.

## NO MINIMUM QUANTITIES

We accept orders from just **one piece!**

## SHORT PRODUCTION TIME

Eco awards are quick to produce. Therefore, we can produce them for you within **1-2 weeks.**

# WOODEN BASES

We have prepared a wide selection of wooden bases for customers who create their own awards. Wooden bases ensure a solid foundation for awards, providing elegance and individuality for any event. Our wood - mainly ash - comes from certified places that practice sustainable production policy.

# SIZES OF WOODEN BASES

One of our priorities is to provide a wide range of products to choose the perfect option for your event. We offer various sizes of wooden bases, allowing you to adapt them to awards. We will be happy to help you choosing the right size!

Standard dimensions of wooden bases are:

220x80x40mm

200x60x40mm

140x75x40mm

140x60x40mm

120x60x40mm

# CUTOUTS IN THE BASES

Our offer of wooden bases includes three different types, offering even greater variety and customization possibilities:

- ✔ Bases without cutouts
- ✔ Bases with a groove through the length of the base
- ✔ Bases with a groove in the middle

# COLOURS OF WOODEN BASES

We offer a variety of colours of the wooden bases to match the award and the nature of the event.

Remember that the colour of the base **does not** affect the price!
